

ENGINE, ENGINE MOUNTING AND EQUIPMENT

Oil filter

Renault Trucks offer

In order for the oil to perform its function, it must be clean. Choosing a Renault Trucks oil filter combined with Renault Trucks Oils oil optimizes engine longevity and vehicle availability.

If foreign particles enter the engine, they can seriously damage it, resulting in high repair costs and immobilization of the vehicle. The Genuine Renault Trucks oil filter is designed to withstand a pressure greater than 14 bars, as is the case during cold starts. If the filter is unable to withstand this pressure, unfiltered oil reaches the engine, with dire consequences.

CHARACTERISTICS	BENEFITS
Very sturdy steel sheet housing.	Eliminates all risks of damage and reduces breakdown risks.
Flexible adhesive seal.	Prevents vibration-related leaks and provides increased pressure protection to avoid damage in the oil circuit.
Specific filter media.	Filters and eliminates particles that could damage the oil circuit, avoiding unnecessary repair costs and reducing repair expenses.
Large filter media area.	High capacity, no risk of clogging between filter replacements, no unnecessary downtime.
Uniform pleating.	Uses the entire filter surface to prevent unnecessary wear.
Flexible rubber seal.	Provides perfect sealing even during cold starts – prevents damage.

Key arguments

Multi-layered filter media with large surface area and uniform folding

- Uses the entire surface of the media.
- No risk of premature clogging between filter changes.
- No unnecessary downtime.

Renault Trucks oil filters contain a folded filter medium, specially produced from fine cellulose fibers, which gives it the desired efficiency and filtration capacity.

Robust and flexible design

- Very sturdy sheet steel housing.
- Flexible adhesive seal.

The outer casing of the Renault Trucks oil filter is made of sheet steel protected against corrosion and resistant to pressure variations. It eliminates all risk of damage and reduces the risk of breakdown.

The Renault Trucks oil filter maintains its efficiency, even at high pressure and with variations in temperature. Indeed, its flexible adhesive seal offers a perfect seal even for cold starts. It also prevents vibration-related leaks and helps prevent impurities in the oil circuit.

Filters available in filtration maintenance kit

- Around fifty filtration maintenance kits available to cover the entire range of Renault Trucks vehicles.
- The certainty of ordering all the parts recommended for the maintenance of your vehicle at once.
- Simplicity and speed of management.

For greater simplicity in managing maintenance operations and in order not to forget any of the parts recommended for the maintenance of your vehicle, consider the Renault Trucks Genuine filtration maintenance kits, including the oil filters that cover the entire vehicle. the range of Renault Trucks vehicles.

The service in addition

- 2 year warranty (parts, labor, repair and towing).
- Start & Drive contracts for appropriate and safe maintenance.
- Packages to offer turnkey solutions to customers.

A wide range of services for all needs:

- The Start & Drive Reference, Performance and Excellence contracts: efficient and tailor-made maintenance;
- The personalized and scalable maintenance plan: to consider vehicle maintenance with complete peace of mind;
- Maintenance packages: packaged interventions with a price fixed in advance for billing without surprises;
- 24/7: for permanent mobility.

Customer benefits

Performance

- Very sturdy sheet steel housing.
- Optimization of filter performance thanks to the flexible adhesive seal.

The Renault Trucks Genuine oil filter has a very solid sheet steel housing which considerably reduces the risk of breakdown and eliminates all risks of damage. The performance of the filter is then guaranteed compared to a competing filter.

A flexible adhesive seal has been specially designed to prevent vibration-related oil leaks and prevent impurities in the oil circuit. The seal also provides increased pressure protection and guarantees maximum filtration performance.

Quality of an original part

- Corresponds to the specifications of the Renault Trucks oil filtration system.
- Best possible protection against combustion particles and residues that damage engine oil.

Depending on the use of their vehicles, Renault Trucks offers its customers a range of dedicated filters:

- Standard: for maintenance intervals of 50,000 km;
- LongLife: for 100,000 km maintenance intervals;
- UltraLife: for maintenance intervals of 150,000 km.

Economy

- 3 types of ranges adapted to your use: Standard, LongLife and UltraLife.
- Controlled maintenance intervals for less downtime and costs on the vehicle.

A 2-year warranty is provided on parts, labor, repair and towing.

All the parts the customer needs are available to ensure a quality repair.

The possibility of ordering the filters in kit form allows a more serene management of the maintenance activities of the vehicle of the customer.

Serenity

- A 2-year warranty (parts, labor, repair and towing).
- Availability of parts.
- Filters available in kit.
