

SUSPENSION AND STEERING WHEELS

Steering parts

Renault Trucks offer

The steering system plays a crucial role in the overall safety and performance of a vehicle. It is essentially the link between the driver and the road.

Renault Trucks offers a complete range that includes all the parts that ensure the various links in the steering system. These parts are available separately from aftermarket.

Key arguments

A full range

- Complete range of steering system components
- All parts are available separately

All steering system components; ball joints, steering drop arm, drag link, steering arm, steering knuckles, track rod arms, tie-rod, etc., are available separately in after-sales.

Certified "Approved Parts"

- Robust and long-lasting components
- Original fit quality

Steering system components are characterised by "Genuine" parts quality. They are specifically designed and developed to fulfil their function and are fully compatible with your Renault Trucks vehicle.

High quality materials

- Reduced wear and increased durability
- Resistant to high temperatures and harsh detergents

"Genuine" Renault Trucks steering components benefit from anti-corrosion surface treatment. In addition, careful choice of the grease used for track rod ends and the material for the gaiters provide the best resistance to high temperatures and harsh detergents to ensure a long service life.

Customer benefits

Safety

- Compliance with a strict industrial process
- Ensures precise steering

The design of steering system parts complies with a strict set of specifications defined by the Renault Trucks engineers. All parts are tested at the end of the production line to guarantee the highest level of quality.

Renault Trucks parts are specifically designed and are sourced from the same production processes as original fit parts. In this way, they benefit from the same technical developments and the same quality controls.

Peace of mind

- Guarantee of optimum integration
- Reduction in costly repairs and collateral damage
- 2-year warranty

Renault Trucks genuine parts integrate perfectly with the whole of the steering system thanks to good machining tolerance, optimum clamping of the Pitman arm and quality tightening.

To avoid extended downtime and costly repairs, it is recommended to check the steering system frequently to detect any faults. Wear or damage to the steering system parts is likely to endanger the entire vehicle and your personal safety.

Renault Trucks genuine parts fitted in an approved Renault Trucks workshop by a certified technician have a 2-year warranty.
